A respected profession as ancient as the Moonfall itself, every Cohort can benefit from having a Delver on the team. For Seranos, though, is more than just a line of work: They want to better understand themselves and the blood that runs through their veins. This drives them to take on challenges other Delvers would never dream of doing.

MYSTERIOUS DISAPPEARANCE OF FATHER

Seranos' father left with a rush on a fateful day in Seranos' youth, promising he'd be back soon. He was never heard from again. This has driven Seranos to understand themselves and their past, particularly their ancestry, but also weighs heavy on their soul with a question that may never be answered.
